

CALFED Objectives

- “Provide good water quality for all beneficial uses”
- Improve ecosystem quality
- Improve water supply reliability
- Improve levee system integrity

General Water Quality Target

“CALFED agencies have adopted a general target of continuously improving Delta water quality for all uses, including in-Delta environmental and agricultural uses.”

ROD, page 65

Water Quality Program Goal

“CALFED’s Water Quality Program goal is to provide good water quality for the million of Californians who rely on the Delta for all or a part of their drinking water.”

ROD, p 65

Drinking Water Objective

“The CALFED drinking water objective is to continuously improve source water quality that allows for municipal water suppliers to deliver safe, reliable, and affordable drinking water that meets and, where feasible, is better than applicable drinking water standards.”

WQPP, page 3-1

Drinking Water Targets

“CALFED Agencies’ target for providing safe, reliable, and affordable drinking water in a cost-effective way, is to achieve either: (a) average concentrations at Clifton Court Forebay and other southern and central Delta drinking water intakes of 50 ug/L bromide and 3.0 mg/L total organic carbon, or (b) an equivalent level of public health protection using a cost-effective combination of alternative source waters, source control and treatment technologies.”

EQUIVALENT LEVEL OF PUBLIC HEALTH PROTECTION (ELPH)
